

# Technical Information

# Turbimax CUE25 / CUE26

Handheld turbidity meter for field measurement

#### Application

Turbimax CUE25 / CUE26 are compact handheld meters for the measurement of turbidity in the field. They are suitable for the following fields of application

- Drinking water
- Process water
- Wastewater

#### Your benefits

- Rugged carrying case containing everything needed
  - battery pack
  - calibration standards
  - manual
- Waterproof case provides use in any wet environment
- Versions with white light source and infrared light source available
- Auto ranging 0.01 to 1100 NTU / FNU
- Simple calibration procedures
- Reusable calibration standards
- Long-life batteries

|---------------------|--|--|--|--|
| Measuring principle | <b>Turbidity measurement</b><br>For turbidity measurement a light beam is sent through the medium and is diverted from its original direction<br>by optically denser particels, e.g. solid matter particles.   |  |  |  |
| Measuring methods   | <b>90° WL scattered light method</b><br>The measurement uses the standardised 90° scattered light method acc. to U.S. EPA 180.1.<br>The turbidity of the medium is determined by the amount of scattered light. The transmitted white light beam<br>is scattered by the solid matter particles in the medium. The scattered beams are detected by scattered light<br>receivers which are arranged at an angle of 90° to the white light source.  |  |  |  |
|                     | <b>90° NIR scattered light method</b><br>The measurement uses the standardized 90° scattered light method acc. to ISO 7027 / EN 27027.<br>The turbidity of the medium is determined by the amount of scattered light. The transmitted light beam with<br>a wavelength in the near-infrared range is scattered by the solid matter particles in the medium. The scattered<br>beams are detected by scattered light receivers which are arranged at an angle of 90° to the infrared light<br>source. |  |  |  |
|                     |  |  |  |  |
|                     | 90° scattered light method   |  |  |  |
| Functions           | <b>IR or white light measurement</b><br>The Turbimax is available as infrared version, CUE25, to meet the design criteria specified in ISO 7027 and<br>DIN 27027. The white light version, CUE26, meets the design criteria on turbidity measurement specified by<br>the US EPA 180.1. Both versions have long life lamps.   |  |  |  |
|                     | Auto ranging 0.01 to 1100 NTU  |  |  |  |

### Function and system design

Turbimax CUE25/26 senses the turbidity level of a sample and automatically adjusts to the appropriate measuring range.

#### Simple calibration procedures

Calibration initiated with the push of a button ensures accurate readings.

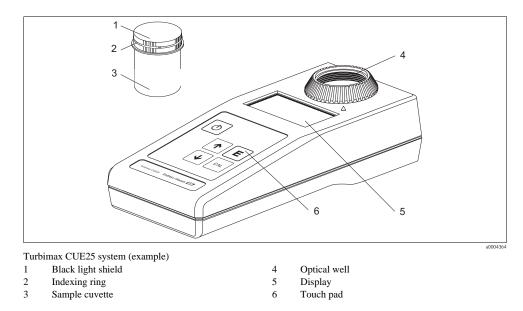

### Reusable calibration standards

The calibration standards allow quick and easy calibration across all ranges without the need to mix Formazin. The standards have a minimum shelf life of 12 months.

### Measuring system

The measuring system comprises:

- Turbimax CUE25 / CUE26 turbidimeter
- Sample cuvette with light shield cap
- Indexing ring

# Input

| Measured variables | Turbidity            |  |
|--------------------|----------------------|--|
| Measuring range    | 0.01 to 1100 NTU/FNU |  |

# Power supply

| Batteries      | 4 AAA alkaline batteries<br>(over 5000 tests) |
|----------------|---|
| Supply voltage | 4 x 1.5 V                                     |

### Performance characteristic

| Response time          | < 14 s   |  |  |  |  |
|------------------------|--|--|--|--|--|
| Reference temperature  | 25 °C (77 °F)  | 25 °C (77 °F)                                  |  |  |  |
| Resolution             | 0.01 NTU below 100 NTU<br>0.1 NTU in the range 100.0 to 999.9 NTU<br>1.0 NTU in the range 1000 to 1100 NTU |  |  |  |  |
| Maximum measured error | 0 to 500 NTU:<br>500 to 1100 NTU:  | ±2 % of reading or 0.01 NTU<br>±3 % of reading |  |  |  |
| Repeatability          | $\pm 2$ % of reading   |  |  |  |  |

### Environment

| Ingress protection | IP 67 / NEMA 4x          |  |  |  |
|--------------------|--------------------------|--|--|--|
| Insulation rating  | Pollution degree 2       |  |  |  |
| Relative humidity  | max. 90%, non-condensing |  |  |  |

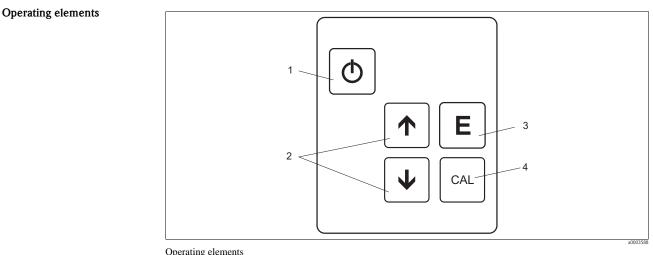

### Process

| Process temperature      | 0 to 50 °C / 32 to 122 °F |
|--------------------------|---------------------------|
| Medium temperature range | 0 to 50 °C / 32 to 122 °F |
| Sample size              | 10 to 15 ml               |

## Mechanical construction

| Dimensions   | Instrument in carry cas                               | 70 x 165 mm (1.875" x 2.75" x 6.50")<br>e<br>250 x 216 mm (2.50" x 10" x 8.50")      |  |  |
|--------------|---|--|--|--|
| Weight       | 1.2 kg (2.7 lbs.)                                     | 1.2 kg (2.7 lbs.)  |  |  |
| Materials    | Instrument housing:<br>Sample cuvette:<br>Carry case: | ABS, injection molded<br>Borosilicate glass<br>High density polyethylene blow molded |  |  |
| Light source | Turbimax CUE25:<br>Turbimax CUE26:                    | Infrared LED, 860 nm<br>Tungsten lamp, ~600 nm, 2250 °K                              |  |  |

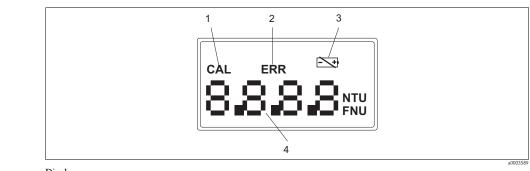

### Human interface

Operating elements

- 1
- 2
- key used to turn the Turbimax on or off
   keys used to set numerical values and to scroll through the list
   key used to index a sample when pressed and held and to start a reading or calibration when released
   key used to enter or exit calibration mode 3
- 4

Display

Display

- Icon indicating calibration mode 1
- 2 Icon indicating error conditions
- 3 Icon indicating low battery
- 4 Display of turbidity levels and user guidance in calibration routine

### Certificates and approvals

| C€ symbol         | <b>Declaration of conformity</b><br>The product meets the legal requirements of the harmonized European standards.<br>The manufacturer confirms compliance with the standards by affixing the <b>C</b> $\epsilon$ symbol. |
|-------------------|---|
| EMC compatibility | Interference emission and interference immunity complies with EN 61326: 1997 / A1: 1998   |
